

KAMAL BDRAN

BACKEND DEVELOPER

Alhakeem St.,Damascus City | +963-938933484 | kmlbdran@gmail.com | [github](#) | [LinkedIn](#) | [Xing](#)

Hello, I'm Kamal, a backend developer with a year and a half of experience in backend development using frameworks like Laravel and Node.js. I specialize in crafting robust web platforms and mobile applications. Alongside my technical skills, I bring valuable experience in managing large-scale real-world projects. This unique blend of technical proficiency and project management expertise allows me to drive projects from inception to successful completion..

SKILLS

Node.js CSS SASS MySQL git Java SpringMVC Linux JIRA RESTful API
Laravel HTML Bootstrap MongoDB Oracle JavaScript Springboot Docker AWS Project Management

PROJECTS

Restaurant Management System **Ladurée** **March 2023 - August 2023**

- I have created a comprehensive restaurant platform using the MERN stack, tailored specifically for the renowned French restaurant Ladurée. This platform offers a seamless and integrated experience for managing various aspects of the restaurant operations, from online ordering to table reservations, enhancing the overall dining experience for Ladurée's customers.

S.A.R.A. **Syrian Association For Rescuing Animals** **April 2024 - August 2024**

- A web platform and mobile application I created for the Syrian Animal Shelter. It streamlines donation management, adoption services, monthly funding, comprehensive animal care management, and automates administrative tasks within the shelter.

HR Management System **SuperShield** **January 2024 - May 2024**

- I actively contributed to an HR Management System both administratively and through backend interface development. This system features a web platform seamlessly integrated with an internal biometric fingerprint device. My involvement spanned overseeing administrative functions and architecting the backend infrastructure, ensuring a robust and efficient system that streamlined HR operations effectively.

Product Distribution System **SuperShield** **May 2024 - August 2024**

- I have also developed a product distribution application that encompasses various roles including the representative, customer, manager, and owner. This application facilitates seamless interactions between these roles, enhancing the distribution process and improving overall operational efficiency.

PROFESSIONAL EXPERIENCE

Project Manager II Backend developer **SuperShield** **January 2024 - present**

- In terms of work experience, I began my journey at SuperShield as a backend developer, initially working on training projects before transitioning to real-world projects. Subsequently, I progressed to the role of Project Manager, leading a full programming team and successfully managing three projects to completion. This transition allowed me to leverage my technical expertise in a leadership capacity, overseeing project execution and ensuring their success.

EDUCATION

Bachelor in Software Engineering **January 2017 - November 2025**
Damascus University
